

INSTASTYLE

UI / UX MASTER

DESIGN PROMPT

Premium · Legacy · Urgency · Next-Level Graphics · Dynamic UX

A complete, screen-by-screen design specification for the InstaStyle instant fashion delivery platform — built under Accesco Living. Every colour, typeface, animation, interaction, and system designed to create desire, deliver urgency, and build a fashion legacy.

COVERS: Design Philosophy · Colour System · Typography · Splash · Onboarding · Home Screen · SwipeStyle · Instant Outfit Builder · Trial at Doorstep · Vibe Check · Virtual Try-On · Thrift Marketplace · FOMO System · Micro-Interactions · Motion Design · Navigation · Design Tokens

Accesco Living Private Limited · InstaStyle Venture · Confidential Design Document

TABLE OF CONTENTS

01	The Design North Star Philosophy, emotional intent, brand DNA
02	Visual Identity & Design Language Texture, grain, glassmorphism, parallax
03	Colour System Full dark palette, gradients, FOMO colors
04	Typography System Three-font architecture, rules, hierarchy
05	Splash Screen 2.8-second cinema entrance sequence
06	Onboarding — 4 Screens of Desire Photography, copy, progression system
07	Home Screen Command centre, FOMO rails, Mood Mode
08	SwipeStyle Discovery Full-screen swipe interface, cart logic
09	Instant Outfit Builder Occasion → AI curation → delivery flow
10	Trial at Doorstep Live tracking, countdown, try-return flow
11	Vibe Check — Social Shopping Group decision, FOMO layer, vote mechanic
12	Virtual Try-On Body-mapping camera interface
13	Thrift Marketplace Circular fashion tab design
14	Size Memory Engine Profile screen, style DNA, fit history
15	FOMO Design System Rules, signals, urgency mechanics
16	Motion Design & Micro-Interactions Every animation defined
17	Navigation Architecture 5-tab system, gestures, accessibility
18	Design System Tokens Complete token reference table

CHAPTER 01

The Design North Star

The single guiding philosophy that governs every design decision.

"Design InstaStyle as if Louis Vuitton, Nike, and a dark-room nightclub had a child — and that child delivered outfits in 20 minutes to urban India."

Every single pixel in the InstaStyle interface must carry three simultaneous truths — three emotional signals that fire at once the moment a user opens the app:

- **This is exclusive** — it feels curated, not mass-market. The user feels chosen by the platform, not the other way around.
- **This is urgent** — something will be gone if they wait. Not because of a fake countdown, but because real scarcity is everywhere.
- **This is theirs** — the platform knows them. It was built for this person, this occasion, this exact moment.

InstaStyle is not a shopping app. It is a personal fashion oracle — cinematic, intelligent, and alive with the energy of a runway backstage. When a user opens InstaStyle, the first emotion they feel must be identical to opening a luxury box that was already expecting them: a warm, electric recognition that something extraordinary is about to happen.

< 3s	20 min	0	∞
Time to create desire	Outfit at door	Wrong-size orders	Legacy feeling

The Three Aesthetic Bloodlines

BRAND DNA	WHAT IT CONTRIBUTES TO INSTASTYLE	HOW IT SHOWS
Bottega Veneta	Luxury restraint — nothing shouts, everything whispers	No loud banners. Dark silence. Confident whitespace.
Nike	Athletic confidence — direct, bold, no apology	Short copy. Strong CTAs. Kinetic motion. Purpose-driven design.
Sabyasachi	Indian soul — the warmth, the gold, the cultural pride	Warm brown palette. Fabric motifs. Occasion-first thinking.
Zara	Speed as luxury — fast is the new exclusive	ETA as hero. Delivery timer as brand feature, not footnote.
Instagram Reels	Infinite swipe desire — the dopamine of discovery	SwipeStyle. Full-screen cards. Thumb-native interaction architecture.

CHAPTER 02

Visual Identity & Design Language

Every surface, texture, and material decision that makes InstaStyle feel premium.

DESIGN ELEMENT	SPECIFICATION	EMOTIONAL EFFECT
Film Grain Overlay	Animated grain texture at 4–8% opacity on all dark backgrounds. Moves at 24fps.	Feels like cinema. Makes the screen feel physical, like fabric.
Glassmorphism Cards	backdrop-filter: blur(24px) · background: rgba(20,18,16,0.7) · border: 1px rgba(196,168,130,0.15)	Depth. Translucency. The outfit feels like it exists behind frosted glass.
Fabric Wave Motif	InstaStyle logo S-curve appears as BG texture at 3% opacity, section dividers, loading states.	Subliminal brand recall. The wave is everywhere but never intrusive.
Micro-Emboss on CTAs	box-shadow: inset 0 1px 0 rgba(196,168,130,0.3), inset 0 -1px 0 rgba(0,0,0,0.4)	Buttons feel physically pressable. Haptic trust before the tap.
Parallax Depth	Outfit images float at z-index 2. Background texture at z-index 0. 8px offset on scroll.	Genuine spatial depth. The outfit exists in three dimensions.
Warm Colour Grading	All editorial photography: slight orange-brown cast. Shadows crushed. Highlights slightly blown.	Consistency. Every image looks like it belongs. Feels curated by the same creative director.
Corner Radius Philosophy	Cards: 16px · Modals: 20px · Pills: 100px · Primary CTAs: 0px (sharp — confidence)	Sharp CTAs signal authority. Rounded surfaces signal comfort. Deliberate contrast.

The logo — a billowing hanger with a fabric wave — is sacred. It animates on loading states, appears watermarked at 4% opacity in glassmorphism cards, and is treated as the founding visual symbol of the brand. It must never be distorted, stretched, or placed on a busy background without sufficient contrast.

CHAPTER 03

Colour System

The full palette — dark mode default, light mode editorial, gradients, and FOMO signals.

Dark Mode — Primary Experience (Default)

HEX	NAME	USAGE
#0B0B0B	Background Base	App background. Near-black with micro warmth. Never pure #000000.
#141210	Surface — Card	All product and outfit cards. Warm dark brown-black. Feels like leather.
#1C1916	Surface — Elevated	Modals, bottom sheets, drawers. Slightly lifted from base.
#8B6347	Brand Warm Brown	Primary CTAs. Active navigation. Logo. The brand's signature tone.
#C4A882	Brand Tan	Text accents. Shimmer lines. Icon active states. Highlight elements.
#5C3D22	Brand Deep Brown	Pressed/active CTA states. Dark variant of primary brand brown.
#F5F0EA	Ivory White	Primary text. Warm. Editorial. Never pure #FFFFFF.
#8A8070	Muted Text	Secondary labels. Timestamps. Metadata. Placeholder text.
#C0392B	FOMO Red	Stock counters. Urgency badges. Used sparingly — maximum impact.
#D4870A	Amber Alert	Limited time signals. Sale ending. Trending now indicators.
rgba(196, 168, 130, 0.15)	Separator	Hairline rules between sections. Barely visible. Structural only.

Gradient Definitions

GRADIENT NAME	CSS DEFINITION	USAGE
Hero Gradient	linear-gradient(160deg, #0B0B0B 0%, #1C1410 50%, #0B0B0B 100%)	Full-screen outfit card backgrounds
CTA Gradient	linear-gradient(135deg, #8B6347 0%, #C4A882 100%)	All primary action buttons
FOMO Gradient	linear-gradient(90deg, #C0392B 0%, #8B1A1A 100%)	Low stock badges. Urgency bars.
Shimmer Animation	linear-gradient(90deg, transparent 0%, rgba(196,168,130,0.3) 50%, transparent 100%)	Animated left-to-right on all New Drop cards
Mood Overlay	linear-gradient(0deg, #0B0B0B 0%, rgba(11,11,11,0) 60%)	Bottom text overlay on all editorial photos

Card Glass	linear-gradient(135deg, rgba(196,168,130,0.08) 0%, rgba(20,18,16,0.9) 100%)	Glassmorphism card inner gradient
------------	---	-----------------------------------

CHAPTER 04

Typography System

Three fonts. One voice. Unmistakable personality at every size.

FONT	ROLE	SETTINGS	USAGE EXAMPLES
Cormorant Garamond Bold	Display / Cinema	48–72px · line-height 0.95 · letter-spacing -0.02em	Hero headline. Tagline. Outfit name. Splash screen text.
Montserrat Black	Feature Labels	9–14px · ALL CAPS · letter-spacing 0.12–0.18em	SWIPESTYLE · ONLY 2 LEFT · TRIAL AT DOORSTEP · Nav labels.
Inter Regular/Medium	Body / Interface	13–16px · line-height 1.6 · weight 400/500	Descriptions. Product details. Form labels. Secondary copy.
Roboto Mono Bold	Precision Data	14–18px · tabular-nums · color #C4A882	Delivery ETA. Stock counters. Timers. Price numbers.

Typography Rules — Non-Negotiable

- **Delivery ETAs always in Roboto Mono Bold.** The mechanical precision of a monospace font at the moment of purchase decision creates measurable psychological urgency.
- **Price display:** Current price in Montserrat Black · Original price in Roboto Mono with text-decoration: line-through and opacity: 0.45 — the discount is felt, not just read.
- **Stock counters:** 'Only 3 left in your size' — Montserrat Black · color #C0392B · subtle pulse animation at 3-second intervals.
- **Never centre-align body text.** Left-align always. Centre reserved exclusively for cinematic hero moments and pull quotes.
- **Feature names always in ALL CAPS** with 0.12em letter-spacing minimum — SwipeStyle, Vibe Check, Trial at Doorstep become proper nouns.
- **No thin weights below 400** on dark backgrounds — legibility is non-negotiable even at the cost of elegance.

CHAPTER 05

Splash Screen

2.8 seconds of pure brand cinema. The first impression that defines everything.

FR AM E	TIMESTA MP	WHAT HAPPENS	EASING / SOUND
0	0.0 – 0.3s	Full black canvas. Complete silence. No logo. No animation. Just black.	None — deliberate emptiness creates anticipation
1	0.3 – 0.9s	Hanger logo drops from the top edge with physics-based spring — overshoots slightly, settles naturally.	cubic-bezier(0.34,1.56,0.64,1) · Soft fabric swish sound (optional haptic)
2	0.9 – 1.6s	The fabric wave S-curve unfurls from left to right in warm brown — flows like a dupatta catching wind.	cubic-bezier(0.16,1,0.3,1) · Silk movement, never mechanical
3	1.6 – 2.2s	Tagline types itself letter by letter in Cormorant Garamond: 'Outfit ready, before you are.' Cursor blinks once, then vanishes.	Typewriter at 40ms per character · Cursor blink: 500ms interval
4	2.2 – 2.8s	Everything fades to 0 opacity except the logo mark. Logo holds for 0.3s at 100%. Then — cut to home screen.	ease-out 400ms · No fade to white — cut to home is cinematic

Background specification: #0B0B0B with animated film grain at 6% opacity. The grain must move at exactly 24fps — the cinema frame rate. This is not decoration; it is the signal that what follows is premium, considered, and intentional.

CHAPTER 06

Onboarding — 4 Screens of Desire

Each screen is a fashion film. Not a tutorial. Not a feature list. An invitation.

Photography Treatment (applies to all 4 screens): All images shot on dark backgrounds with multiply blend overlay. Models always in motion — fabric mid-movement, hair trailing, stride captured. No static catalogue poses. Colour grade: warm orange-brown cast, shadows crushed to near-black, highlights slightly overexposed for editorial feel. The overall impression must be a fashion magazine printed on a screen.

SCR EEN	HEADLINE	VISUAL	SUBTEXT	CTA
1 of 4	15 Minutes. The Whole Look.	Woman mid-twirl, outfit fabric frozen in motion. Dark bg.	Your complete outfit. Dark store to doorstep. Before the moment passes.	ENTER INSTASTYLE
2 of 4	Try First. Pay for What Stays.	Rider at door. Woman inside holding two outfits, deciding. Cinematic angle.	Your rider waits. Your mirror decides. Zero commitment until you're certain.	CONTINUE
3 of 4	Swipe Your Story.	Close-up of hand swiping phone. Editorial outfit visible behind screen.	Swipe right. Build your cart. Let InstaStyle learn your taste in real-time.	CONTINUE
4 of 4	Your Size. Remembered. Forever.	Golden measuring tape, close shot, warm light. Abstract but clear.	Set your measurements once. InstaStyle never wrong-sizes you again.	START →

Progress indicator: Thin horizontal lines — not dots. Brand brown fill progressing left to right. Each line is 60px wide with 6px gap. Active line fills on 300ms ease-in-out. This is the Adidas stripe system — horizontal authority, not circular softness. CTA button: Full-width, brand brown gradient, border-radius: 0px (sharp — confidence), Montserrat Black, ALL CAPS.

CHAPTER 07

Home Screen — The Command Centre

The most important screen in the app. Every element must earn its place.

TOP NAVIGATION BAR — ALWAYS VISIBLE

- Left: InstaStyle hanger+wave logo at 28px — tapping returns to home
- Centre: Live delivery ETA pill — '■ 17 MIN TO YOU' in Roboto Mono, warm brown background, pulsing green dot (2s pulse cycle)
- Right: Profile avatar with thin warm brown ring (Style Score indicator) · Badge shows unread VIBE CHECK requests
- Background: Fully transparent over hero content — sticky but not blocking

HERO OUTFIT CARD — 65% OF SCREEN HEIGHT

- Full-bleed editorial outfit photograph. No borders. No padding. Edge-to-edge.
- Bottom gradient overlay rises from black to transparent — copy lives here
- Occasion tag in top-left: 'DATE NIGHT' / 'OFFICE MONDAY' / 'FESTIVAL DROP' — Montserrat Black, pill shape, brand brown bg
- FOMO stock counter: 'Only 3 left in your size' — Roboto Mono, FOMO Red, positioned top-right
- Delivery badge centre-bottom: '■ 17 MIN' in brand brown pill — Roboto Mono Bold
- Secondary CTA (ghost button): 'VIBE CHECK →' — sends outfit to friends for group vote
- Primary CTA (full-width): 'ADD TO CART' — brand brown gradient, sharp corners, Montserrat Black
- Swipe left/right on the hero card to cycle through Featured Drops

FOMO HORIZONTAL RAILS — BELOW HERO

- JUST DROPPED — items less than 2 hours old. Each card: shimmer animation across top edge + 'NEW' badge with radial glow
- ALMOST GONE — low stock items. Animated depleting bar beneath each card (fills right-to-left to zero like a countdown)
- TRENDING IN [YOUR CITY] — real-time popularity rank. Heatmap-style micro-indicator shows local demand heat
- VIBE CHECK PICKS — outfits your friends have voted YES on. Social proof made visual
- QUICK REORDER — last 3 ordered outfits. One tap reorder. Positioned just above the nav bar

Mood Mode Entry Point

A persistent floating pill button above the bottom nav bar: '■ SET YOUR MOOD' — brand brown background, Montserrat Black, 100px border-radius. Tapping opens a full-screen bottom sheet with 6 mood tiles: FESTIVE / BOLD / MINIMAL / ROMANTIC / PROFESSIONAL / CASUAL. Each tile has an illustrative background texture and a one-word descriptor. Selecting a mood triggers a full-screen colour temperature shift across the home feed in 500ms ease-in-out — warm amber for Festive, cool blue-grey for Professional — and re-curates all outfit cards to match the emotional state.

CHAPTER 08

SwipeStyle Discovery

The most addictive screen in the app. Tinder for fashion. Built with luxury restraint.

SwipeStyle is a dedicated full-screen tab. The moment the user enters, the nav bar disappears and the outfit takes over 100% of the screen. No chrome. No distractions. Just the outfit, the user, and a decision.

GESTURE	ACTION	ANIMATION	RESULT
Swipe RIGHT	Love it — add to SwipeStyle Cart	Card snaps right with a spring. Heart + sparkle burst from card centre in brand tan.	Item added to SwipeStyle Cart. Cart icon badge increments.
Swipe LEFT	Pass — dismiss outfit	Card curls away like fabric lifting in wind — rotate + translate, fabric wave on exit.	Outfit dismissed. Next card spring-loads from behind.
Swipe UP	Share to Vibe Check	Card launches upward with a velocity curve. Morphs into a sharing card in flight.	Vibe Check flow opens. Friends selection appears.
Long Press	Instant Outfit Builder context	Card scales to 1.04 with a haptic buzz. Info drawer rises from bottom.	See all items in this outfit. Add individual pieces or the full set.
Double Tap	Save to Wishlist	Double-heart burst animation — two hearts, staggered 80ms, rise and fade.	Item saved to Wishlist. Subtle confirmation toast.

SWIPESTYLE CARD ANATOMY

- Outfit image: full-screen, 3:4 aspect ratio, edge-to-edge, no border radius on card
- Brand / style name: bottom-left, Cormorant Garamond Bold, 22px, ivory
- Price: bottom-left below name, Montserrat Black (current) + Roboto Mono strike-through (original)
- Occasion tags: bottom-left pills in Montserrat Black 9px
- Xpense Meter chip: bottom-right — '✓ Within Budget' in green or '■ ■340 over' in amber
- Ghost button bottom-centre: '■ VIRTUAL TRY-ON' — appears after 1.5s on card, fades in
- Stack depth indicator: 3 cards visible behind current card, progressively scaled and offset

SwipeStyle Cart: A persistent handle at the bottom edge of the SwipeStyle screen — a 4px brown line with a small pull tab. Dragging up reveals all swiped-right items as a stacked card grid. A single 'SEND TO MAIN CART' button locks in selections. The cart icon in the main nav shows a live count badge with brand brown background.

CHAPTER 09

Instant Outfit Builder

Select an occasion. InstaStyle builds the complete look. Delivered in minutes.

S T E P	SCREEN	INTERACTION	DESIGN DETAIL
1	Occasion Selector	Horizontal pill scroll: WEDDING GUEST / FIRST DATE / OFFICE / NIGHT OUT / FESTIVAL / CASUAL	Each pill has a matching illustrative icon and a subtle background pattern. Active pill: brand brown fill, ivory text.
2	Style Persona	3 large visual tiles: CLASSIC / BOLD / MINIMAL	Illustrated — not text only. Full-bleed photography tile. Selection: 3px brown border + scale 1.02.
3	AI Curation Loading	Full-screen: 'InstaStyle is building your look...'	Logo fabric wave animates in infinite loop. Grain overlay pulsing. Duration exactly 1.8 seconds.
4	Outfit Set Reveal	Top / Bottom / Shoes / Accessory slide in sequentially from bottom	80ms stagger between each item. Each slides up with spring. Total reveal: 400ms. Price builds live.
5	Individual Swap	Tap any item card to see 3 alternatives	Item card lifts (scale 1.04 + shadow). Alternatives slide in from right as a carousel.
6	Delivery Promise	Sticky bottom: '■ Complete outfit in 18 min'	Roboto Mono. Pulsing green dot. Updates live. Never disappears during outfit review.
7	Order CTA	Full-width: 'ORDER COMPLETE LOOK'	Brand brown gradient. Sharp corners. Montserrat Black. Slight grain texture on button surface.

CHAPTER 10

Trial at Doorstep

The most trust-building feature. The rider waits. You decide.

PRE-ORDER EXPLANATION SCREEN

- Full-screen cinematic illustration: rider silhouette at door, warm light from inside, outfits visible
- Headline: 'Try First. Pay for What You Keep.' — Cormorant Garamond, 38px
- Three trust icons with single-line copy: Rider waits 15 min · Pay only for keeps · Zero pressure
- CTA: 'SELECT TRIAL ITEMS' — opens outfit selection modal from checkout

LIVE TRACKING SCREEN — DURING DELIVERY

- Dark map view with warm map styling (dark streets, gold roads, brown accent pins)
- Rider location as a live animated dot — not static marker
- Countdown in Roboto Mono Bold: 'Rider arrives in 4 min' — updates every 30 seconds
- Outfit mini-carousel bottom: 'Getting ready to try:' — all incoming items shown
- Playful preparation checklist appears at T-2 min: Good lighting ✓ · Mirror nearby ✓ · Decide fast ✓
- These checklist items tick themselves with a 200ms stagger — creates anticipation and humour

TRIAL TIMER SCREEN — RIDER AT DOOR

- Full-screen countdown: 15:00 → 00:00 as a circular progress ring in brand brown
- Ring depletes clockwise. At 5 minutes remaining: ring turns amber. At 2 minutes: FOMO Red.
- Centre of ring: large Roboto Mono Bold time display — most prominent element on screen
- Bottom: Item checkboxes — KEEP / RETURN for each item. Total updates live as selections change.
- CONFIRM & PAY button — only activates when all items are marked Keep or Return

CHAPTER 11

Vibe Check — Social Shopping

Shopping is a team sport. InstaStyle makes it one.

ST E P	SCREEN / ELEMENT	DESIGN DETAIL
1	Friend Selection	Circular avatars from contacts. Max 5 friends. Tap to select. Selected: brown ring. Deselected: grey ring.
2	Share Card Composition	Outfit card with InstaStyle watermark, user's name, and a branded frame. Feels like an editorial story share.
3	Friend Push Notification	From: InstaStyle · 'Priya wants your take ■' · 3 quick-react options shown directly in notification.
4	Friend Reaction Options	■ YES / ■ MAYBE / ■ NO — large touch targets, minimum 72px. No typing required. Pure instant reaction.
5	Results Display	Animated vote tally: '3 of 4 say YES ■' — bar fills in brand brown, face icons stack beside bar.
6	FOMO Layer Trigger	If stock drops during Vibe Check: red alert banner appears over results: 'Stock dropping — 2 left in your size.'
7	Final CTA	'They said YES. Order Now →' — full-width, FOMO Red gradient at urgency state. Brand brown if no stock pressure.

CHAPTER 12

Virtual Try-On

Digital body-mapping. See the fit, fall, and proportion before ordering.

VIRTUAL TRY-ON INTERFACE SPEC

- Full-screen camera view with a thin brand brown frame border — feels premium, like a viewfinder
- Body detection overlay: subtle white skeleton mapped to user's body at 40% opacity
- Outfit drapes over the user in real-time body-mapped layering — fabric physics simulated
- Three analysis tabs bottom: FIT · FALL · PROPORTION — each reveals measurement annotations
- Size recommendation appears top-right: 'Your size: M · Based on your profile' — Montserrat Black, ivory
- Swap outfit button: bottom-left ghost button. Outfit cycles without closing the camera.
- Persistent CTAs: ADD TO CART (full-width, brand brown) + TRY ANOTHER (ghost button)
- Permission onboarding: single-screen illustration, 'Point at yourself. We handle the rest.' — zero friction

CHAPTER 13

Thrift Marketplace

Circular fashion. Curated pre-owned. Sustainability made desirable.

The Thrift Marketplace tab has a deliberately warmer colour temperature than the main InstaStyle experience — more tan, less black. It feels curated and vintage, like a premium second-hand boutique in South Mumbai rather than a flea market.

THRIFT TAB DESIGN SYSTEM

- Background: #141008 — slightly warmer and more amber than the main app dark background
- Layout: Pinterest-style masonry grid — 2 columns, variable card height based on image
- Each card: editorial product photo (never flat catalogue) + condition badge + CO2 saving chip
- Condition badges: LIKE NEW / GENTLY USED / VINTAGE FIND — muted pill, Montserrat Black
- Original price struck through in Roboto Mono · Thrift price in brand tan Bold
- Seller: small circular avatar + verified tick for approved vendors + seller rating
- Sustainability badge: '■■ You save 3.2 kg CO■' — displayed on every item, consistently
- Community impact bar: top of tab — 'Community Impact: 1,240 items rescued this month'
- Sell CTA: persistent FAB bottom-right — 'SELL NOW' — brand brown, circular, 56px

CHAPTER 14

Size Memory Engine & Style Profile

The feature that makes InstaStyle feel like it was built for this one person.

PROFILE SCREEN ARCHITECTURE

- Top: User avatar with a Style DNA tag — e.g., 'Minimal Contemporary · L in most brands'
- Style Score ring: circular progress indicator around avatar — fills based on order history and accuracy
- Size Memory Card: body silhouette with size overlays per brand. Each brand shown as a small logo with their specific size for this user.
- Confidence Score: '94% size match accuracy' — Roboto Mono, brand tan
- Fit History Timeline: past orders with KEPT / RETURNED tags. Return reasons as colour-coded chips.
- Occasion Wardrobe View: outfits owned, organised by occasion type with an AI gap analysis
- Gap Analysis Card: 'You have no formal evening wear. 3 outfits curated for you.' — drives re-engagement
- All profile data presented in card components with the glassmorphism treatment

CHAPTER 15

FOMO Design System

Every screen must have at least one active urgency signal. Never panic — always editorial.

"FOMO signals must never feel desperate. They are editorial callouts — factual urgency, not panic design."

FOMO SIGNAL	COPY FORMAT	VISUAL TREATMENT	TRIGGER CONDITION
Stock Counter	'Only 2 left in your size'	Roboto Mono · #C0392B · 2s pulse animation	Stock under 5 in user's declared size
Social Proof	'12 people viewing this now'	Montserrat Black · Muted text colour · Static	Live concurrent viewers on product page
Recency Signal	'Ordered 47 times today'	Small tag · Brand tan · No animation	Order count threshold exceeded
Delivery Window	'Order in 8 min for 6:30 PM delivery'	Roboto Mono · Amber · Countdown active	User near delivery cutoff window
Price Scarcity	'Sale ends in 02:14:33'	Roboto Mono Bold · FOMO Red · Depleting bar	Promotional event with defined end time
Vibe Check Override	'3 friends voted YES — 1 left in stock'	Red alert banner · Full-width · Pulsing border	Positive votes + stock drop simultaneous
New Drop Alert	'Dropped 47 minutes ago'	Shimmer sweep on card · NEW badge with glow	Item listed under 2 hours ago
Trending Badge	'#1 in Date Night outfits today'	Crown icon · Brand tan · Static pill	Algorithmic rank in occasion category

CHAPTER 16

Motion Design & Micro-Interactions

Every animation is intentional. Every transition tells a story.

INTERACTION	ANIMATION SPEC	DURATION / EASING
Add to Cart	Item card scales up (1 → 1.04 → 1). Ghost copy detaches, flies arc trajectory to cart icon. Cart icon bounces on receipt.	240ms scale · 400ms arc · cubic-bezier(0.34,1.56,0.64,1)
Swipe Right (Love)	Card translates right + rotate 8deg. Heart burst + 6 sparkle particles from card centre in brand tan. Next card spring-loads.	300ms swipe · 200ms particle burst · spring physics
Swipe Left (Pass)	Card curls away — rotate + translate with fabric wave trail on exit edge. Opacity fades to 0 at 60% travel.	280ms · cubic-bezier(0.25,0.46,0.45,0.94) · trailing opacity
Outfit Builder Reveal	Top/Bottom/Shoes/Accessory cards slide up sequentially from below viewport. Each spring-bounces into position.	80ms stagger · 360ms per card · cubic-bezier(0.34,1.56,0.64,1)
Mood Mode Switch	Full-screen colour temperature wash — warm to cool or vice versa. All cards re-render with new curation.	500ms ease-in-out · colour transition only · no layout shift
Logo Loading State	Fabric wave in logo animates infinite loop — smooth, billowing S-curve wave motion. Never abrupt, never mechanical.	Infinite · 1.8s cycle · cubic-bezier(0.37,0,0.63,1)
Page Transitions	Screens slide in from right with fabric-like ease — not linear, not bounce — fluid, like fabric settling after movement.	320ms · cubic-bezier(0.25,0.46,0.45,0.94)
FOMO Stock Update	Counter decrements with a brief #C0392B flash on the number. Number scales 1 → 1.15 → 1 on change.	150ms flash · 200ms scale · ease-in-out
ETA Pulse	All delivery ETA chips: subtle radial glow pulse. The green dot scales 1 → 1.4 → 1 every 2 seconds.	2s interval · 400ms per pulse · ease-in-out
Vibe Check Vote Tally	Vote bar fills in brand brown from 0% on results reveal. Face icons slide in from left with 60ms stagger.	600ms bar fill · ease-out · 60ms stagger per face
Trial Timer Ring	Brown ring depletes clockwise from 100% to 0% over 15 minutes. Linear depletion — no easing on this one.	Linear · 15min duration · amber at 5min · red at 2min
Double Tap Wishlist	Two hearts rise and fade from tap point — staggered 80ms. First heart: brand brown. Second: brand tan.	400ms per heart · 80ms stagger · ease-out + fade

CHAPTER 17

Navigation Architecture

Every key feature reachable in 2 taps maximum. Zero hamburger menus.

TAB	ICON	DESTINATION	ACTIVE STATE
HOME	Hanger + wave (simplified)	Command centre — Hero card, FOMO rails, Mood Mode	Icon fills brand brown · thin brown top-border line
SWIPE	Two overlapping cards	SwipeStyle full-screen discovery feed	Same treatment · nav hides on entry
BUILD	Puzzle piece / outfit set	Instant Outfit Builder — occasion → curation	Same treatment
THRIFT	Circular arrows + hanger	Thrift Marketplace — pre-owned fashion tab	Same treatment · warmer bg on entry
PROFILE	Minimal silhouette	Size Memory Engine, Style Profile, Fit History	Same treatment

Persistent Floating Elements

- **Mood Mode FAB:** Floating pill above nav bar — '■ SET YOUR MOOD' — brand brown, 100px radius, always visible except in SwipeStyle and Try-On screens.
- **Just Say It Mic:** Circular FAB bottom-right at 56px — voice input to search, route to any feature. Brand brown. Available on Home and Build tabs.
- **ETA Chip:** Sticky in top bar on all screens during an active order — live countdown, never dismissable.
- **Cart Badge:** Live item count on nav cart icon. Brand brown background. Animates (scale 1→1.3→1) on new item add.
- **No hamburger menu. No nested navigation. No drawer.** Every destination is one tap from the nav bar.

CHAPTER 18

Design System Tokens — Complete Reference

The specification that keeps the entire system consistent across every component.

Token Category	Token Name	Value
Border Radius	radius-card	16px
Border Radius	radius-modal	20px — top corners only
Border Radius	radius-pill	100px
Border Radius	radius-cta-primary	0px — sharp, authority signal
Border Radius	radius-cta-secondary	8px
Spacing	spacing-base	8px base grid — all spacing multiples of 8
Spacing	spacing-card-padding	16px horizontal · 20px vertical
Spacing	spacing-section-gap	24px between horizontal scroll sections
Shadow	shadow-card	0 4px 40px rgba(0,0,0,0.6)
Shadow	shadow-elevated-modal	0 -8px 60px rgba(0,0,0,0.8)
Shadow	shadow-cta-brown	0 4px 20px rgba(139,99,71,0.4)
Animation	ease-spring	cubic-bezier(0.34,1.56,0.64,1)
Animation	ease-fabric	cubic-bezier(0.25,0.46,0.45,0.94)
Animation	ease-standard	cubic-bezier(0.4,0,0.2,1)
Animation	duration-standard	300ms
Animation	duration-modal	450ms
Animation	duration-page-transition	320ms
Animation	duration-micro	150ms
Image	aspect-outfit-card	3:4 portrait
Image	aspect-hero	Full screen — no fixed ratio
Image	aspect-thrift-card	Variable — masonry grid
Live Data	eta-refresh-interval	Every 30 seconds
Live Data	stock-counter-refresh	Every 60 seconds or on websocket push

Live Data	trending-signal-refresh	Every 5 minutes

Haptics	haptic-add-cart	Medium impact — impactMedium
Haptics	haptic-timer-warning	Heavy impact at T-2 min in trial timer
Accessibility	min-touch-target	48x48px on all interactive elements
Accessibility	colour-contrast-min	WCAG AA — 4.5:1 for body text
Accessibility	font-scale-support	Up to 200% system font scale — no layout break

INSTASTYLE — THE DESIGN MANDATE

This document is not a set of guidelines. It is a contract between the design, development, and product teams — a shared commitment that every pixel, every animation, every word of copy, and every interaction will carry the same emotional truth: InstaStyle is where fashion becomes instant, personal, and inevitable. Build it like a legacy. Because it is one.
